

AccuLock™

It all comes together with AccuLock

AccuLock™ S Consumables with Bernard® Conventional Rear-Loading Liners on Miller® Packages

Starting March 7, 2023, Bernard® BTB MIG Guns with select Miller® packages will ship with a version of AccuLock that consists of a diffuser compatible with the common conventional style liners you are used to using, plus the added benefit of standard AccuLock S contact tips and nozzles.

AccuLock™ can transform the way businesses manage their MIG welding gun consumables — helping to optimize productivity, operating costs and welder confidence.

- Less tip changes
- Less welding troubleshooting
- More beads worth bragging about

You will benefit from:

Longer Tip Life

- Reduced contact tip replacement frequency
- Contact tips are 60% buried within the diffuser for less exposure to the heat of the weld
- Mating tapers on both tip-to-diffuser and diffuser-to-neck connection for good electrical conductivity
- Shielding-gas cools contact tip tail
- Less rework and ease of maintenance/replacement

Less Rework and Ease of Maintenance

- Coarse thread contact tips speed tip replacement
- Steel retaining ring on diffuser helps keep threaded nozzle in place during use/cleaning

AccuLock S Consumables with conventional rear-load liners will be available on Miller® Packages, starting March 7, 2023:

- [IntellX™ Wire Feeders](#)
- [IntellX™ Swingarc™](#)
